

ORACLE VALIDATED INTEGRATION DATA SHEET

GUSCOM AG

guscom.POS Integration with Oracle Hospitality OPERA 5.5

A stable yet flexible point-of-sale (POS) system, guscom.POS is right for all types of restaurants and shops. Easy to learn with customizable modules, guscom.POS can be operated on a standard PC, a professional touch screen terminal, or an Android Tablet.

COMPANY OVERVIEW

Founded in 2003 by a team of professionals with experience in the IT, food and beverage, and retail industries, GUSCOM AG has developed three main products: guscom.POS, guscom.SHOP and guscom.MOBILE. The software is adapted to the requirements of restaurants and shops of all kinds. Customers—including hotel chains, florist chains, bakery chains, and wellness businesses—have access to a number of additional modules with functionality such as time recording, voucher support, kitchen monitoring, and interfaces to other systems. In 2007, GUSCOM AG established a subsidiary in Belarus to serve the Eastern European market.

INTEGRATION OVERVIEW

The guscom.POS interface to Oracle Hospitality OPERA fulfills all requirements of the Oracle Hospitality Global Business Unit's IFC8-XML POS Interface Specification. The data exchange is constantly monitored and logically checked. All transactions are permanently logged to ensure transparency and quality.

INTEGRATION DETAILS

The interface enables the following:

- Send inquiries to Oracle Hospitality OPERA property management system (PMS) to check room occupancy. Inquiries can be done by room number, guest name, or Track2 data (keycard ID).
- Send room postings to Oracle Hospitality OPERA PMS.
- Select Oracle Hospitality OPERA PMS transaction code by revenue center, serving time, sales itemizers (article's group), or payment method.
- Send cash or credit card postings to Oracle Hospitality OPERA PMS.
- Handle NoPost flags and CreditLimit notices received from Oracle Hospitality OPERA PMS.
- Handle individual postings for each room occupant.
- Post covers.
- Void a previous posting.

ORACLE Validated Integration Oracle Hospitality

Oracle Validated Integration provides customers with confidence that a partner's integration with an on-premise Oracle application is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.
